

KAISER PERMANENTE COMPREHENSIVE FORMULARY

This document includes Kaiser Permanente Georgia's formulary as of February 23, 2011. For an updated formulary, please visit our Web site at members.kp.org or call 1-888-865-5813, Monday through Friday 8:30 a.m. to 9 p.m., Saturday and Sunday 8 a.m. to 2 p.m TTY/TDD users should call 1-800-255-0056.

What is the Kaiser Permanente Drug Formulary?

A formulary is a list of drugs determined to be safe and effective. Use of formulary drugs enables Kaiser Permanente to provide optimal care to you and your family at reasonable costs. Kaiser Permanente continually updates the formulary throughout the year based on new medical evidence, considering the recommendations of appropriate physician experts. Our physicians and pharmacists work closely together to ensure that our formulary meets your needs.

What drugs are included in the formulary?

Please see the list of formulary drugs beginning on page 7. Coverage for prescription drugs is limited to those drugs that are included on the Kaiser Permanente formulary.

Does the formulary ever change?

Yes, Kaiser Permanente continually updates the formulary yearly based on new medical evidence, considering the recommendations of appropriate physician experts and notifies our doctors, pharmacists, and other clinicians about any changes. If a change in the formulary affects any of your prescriptions, your doctor or pharmacist will let you know.

The enclosed formulary is current as of February 23, 2011. To get updated information about the drugs covered by Kaiser Permanente, please visit our Web site at members.kp.org or call Customer Service at 1-888-865-5813, Monday through Friday 8:30 a.m. to 9 p.m., Saturday and Sunday 8 a.m. to 2 p.m. TTY/TDD users should call 1-800-255-0056.

What if I want or my doctors prescribes a non-formulary drug?

If you request a non-formulary drug, you will be responsible for the full cost of that drug unless your prescribing physician identified a clear medical reason to use it rather than the similar formulary drug. In specific cases, such as an allergy to the formulary alternative, your physician may request an exception for coverage of a non-formulary drug. In that case your regular pharmacy copay would apply. Certain prescriptions require expert review before they can be dispensed.

How do I use the Formulary?

There are two easy ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 7. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, "Cardiovascular Agents." If you know what your drug is used for, simply look for the category name in the list that begins on page 7. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you can look for your drug in the Index that begins on page 24. The Index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug on the list.

What are generic drugs?

Kaiser Permanente covers both brand-name drugs and generic drugs.

Brand-name drugs are drugs that are produced and sold under the original manufacturer's brand name.

Generic drugs are produced and sold under their chemical names after the patent of the brand-name drug expires. Although the price is lower, the quality and effectiveness of generic drugs is the same as brand-name drugs. The Federal Food and Drug Administration (FDA) requires that generic drugs contain the same active ingredients in the same amount as the brand-name drug. Kaiser Permanente pharmacies stock only generic drugs that have met the high standards of both the FDA and the experts in our quality assurance program.

Generic drugs are listed in lower-case italics (e.g., *amoxicillin*) within the formulary on page 7. Brand-name drugs are capitalized in the formulary (e.g., FLOVENT).

Generally, if a drug is available generically, the generic is on the formulary and the brand is not. Because all drug product strengths and package sizes of a formulary drug are not necessarily included on the formulary, check with your Kaiser Permanente pharmacist for clarification, if needed.

How much will I pay for Covered Drugs?

Coverage for prescription drugs is limited to drugs for which a prescription is required by law and those that are listed on the Kaiser Permanente drug

formulary. Certain diabetic supplies do not require a prescription, but must still be listed in our formulary in order to be covered under this benefit. Each prescription refill is provided on the same basis as the original prescription. Copayments are applied on a per prescription basis, for up to the lesser of the dispensing amount listed in the “Schedule of Benefits” or the standard prescription amount, including maintenance drugs as determined by Health Plan.

The standard prescription amount for the following items is:

- Migraine medications — the smallest package size available.
- Ophthalmic, otic and topical medications — the smallest available.
- Oral and nasal inhalers — the smallest standard package unit.

Are there any other restrictions on coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Quantity Limits (QL):** For certain drugs, Kaiser Permanente limits the amount of the drug that will be covered. For example, we provide a 2-week supply per copay for Zyvox (linezolid).
- **Age Restriction (Age):** For certain drugs, Kaiser Permanente limits coverage up to a designated age.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 6.

What if my drug is not on the Formulary?

You have two options:

You can contact Customer Service at 1-888-865-5813, Monday through Friday 8:30 a.m. to 9 p.m., Saturday and Sunday 8 a.m. to 2 p.m. TTY/TDD users should call 1-800-255-0056 and ask Customer Service for a list of similar drugs that are covered. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered under the Kaiser Permanente Drug Formulary.

- You can request an exception for coverage of your non-formulary drug. *(See below for information about how to request an exception.)*

How do I request an exception to the Formulary?

There are several types of exception requests you can submit.

- You can request coverage for a drug, even though it is not on our formulary.
- You can request that we waive coverage restrictions or limits on your drug. For example, for certain drugs, we limit the amount of the drug that we will cover. If your drug has a quantity limit, you can request ask us to waive the limit and cover more.

Generally, Kaiser Permanente will only approve your request for an exception if the alternative drugs included on the plan's formulary or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact your physician to initiate the request for exception process. When you are requesting a formulary or utilization restriction exception, you should submit a statement from your physician supporting your request. Generally, Kaiser Permanente must make our decision within 72 hours of your request.
